Moray Baruh

Student in Computer Engineering, master's degree

Looking for iOS or web backend internship starting February 2018.

Work Experience

Since January 2017 EPITA, Paris

Teaching assistant (YAKA/ACU). Charged of creating and grading C, C++ and Java projects for third year engineering students as well as help them. My main role was to supervise and improve the Tiger Compiler project.

September 2016 - January 2017 ipso santé, Paris

Intern as iOS developer. Charged of developing new features and maintaining a medical record application for iPad.

March 2016 - March 2017 DringDring, Paris

Co-founder and iOS developer. Helped found a startup based on peer-to-peer delivery. Developed the iOS application from scratch.

June - August 2015 Valensas, Istanbul

Intern as iOS developer. Charged of creating proof of concept prototypes.
